

Career Fair 2008

Place: „Potsdam“ SIM in Second Life
<http://slurl.com/secondlife/Potsdam/91/68/34>

Date: Thursday, July 24th 2008, 4 p.m. – 7 p.m.

In the framework of the workshop “*Molecular Interactions 2008*” and the research project “*Training for entrepreneurs in virtual worlds*” (Bio-VWe) the first virtual career fair will take place at the “Potsdam” SIM in Second life which is provided by University of Potsdam. The career fair invites representatives from companies and organizations as well as students, postgraduate students and postdocs from life sciences. We offer an exciting program of lectures and exhibition booths with lots of information about the participating companies and institutions. The exhibition area is intended as a place where employers and candidates can meet and discuss.

Companies and organizations that are interested to provide a booth are welcome to contact us. We also set up avatars for those visitors who do not already own an avatar or do not know how to get one.

Live Audio Stream at virtual career fair
